Job Title: Welder

Job Summary: Dalton Industries, certified to ISO 9001:2008 quality standards is seeking to recruit a welder to join our Fabrication Team. This position will be responsible for welding steel and tubing and other weldable material by applying appropriate welding techniques, under the direction of the Shop Foreman.

Essential Duties and Responsibilities:

- Perform welding activities with minimum instructions and supervision
- Ability to judge the type and gauge of steel to be welded, making proper heat adjustments as required.
- Subject completed welding tasks to appropriate inspections.
- Utilize material handling equipment in conjunction with welding tasks.
- Maintain required production records for jigs, fixtures and machines.
- Perform minor maintenance on equipment.
- Assume responsibility and care of assigned tools and equipment.
- Observe and practice safety procedures and policies.
- Other duties as required.
- Welds components in flat vertical or overhead positions.
- Ignites torches or starts power supplies and strikes arcs by touching electrodes to metals being welded, completing electrical circuits.
- Clamps, holds, tack-welds, heat-bends, grinds or bolts component parts to obtain required configurations and positions for welding.
- Operates manual or semi-automatic welding equipment to fuse metal segments, using processes such as gas tungsten arc, gas metal arc and flux-cored arc, plasma arc and shielded metal arc, resistance welding and submerged arc welding.
- Other duties as assigned.
- Welding all types of steels and alloys
- Heavy plate welding 1/4" to 12" thick personal hand tools required

Qualifications: Knowledge - HS diploma or equivalent. Ability to use hand-welding or flame-cutting equipment to weld or join metal components or to fill holes, indentations or seams of fabricated metal products.
